

Practical - 1

Practical Title: Project Initiation, Requirement Analysis, Sitemap, Wireframe, and GitHub Setup

Problem Definition: Initiate the semester-long StudentHub portal by identifying the problem scope, user roles, key modules, navigation flow, and minimum 10 pages. Create a sitemap, low-fidelity wireframe, project folder structure, README file, and GitHub repository.

A. Theory

1. What is URL and parts of URL?

Answer: A URL (Uniform Resource Locator) is the unique web address used to find and access resources like web pages, images, or files on the internet.

Parts of URL:

Protocol, Subdomain, Domain name, top-level domain, port number, path.

From : ppt

2. How does HTML file process in web browser?

Answer: Web browser processes an HTML file by converting raw code into a visual, interactive webpage through a sequence known as the Critical Rendering Path.

From: Google

3. How will page navigation flow managed among all HTML pages?

Answer: Navigation is managed using the <a> tag. Each page has links to the other HTML pages through the navigation bar, allowing users to move from one page to another easily and maintain a consistent website structure.

From: ppt

4. How will GitHub commits be maintained after each practical?

Answer: After completing each practical, I save all the changes, stage the modified files using git add, create a meaningful commit with git commit -m "Practical X completed" and then upload the commit to GitHub using "git push."

B. Implementation/ Output/Result (Keep only one option which is suitable to practical)

C. Evidence of Work (Screenshots)

The image shows a wireframe of a web application interface, divided into two main sections. The top section is a registration form titled "STUDENTHUB PORTAL". It contains two input fields labeled "Email" and "Password", each with a placeholder "Value". Below these fields is a dark "Register" button. Underneath the button is the text "Already have an account?" followed by a light gray "LOGIN" button. The bottom section represents a user dashboard. It features a purple circular profile picture placeholder on the left. To the right are two buttons: "DASHBOARD" and "REGISTER". Below these is a large gray header bar with the text "StudentHUB" in a script font. On the left side of the dashboard is a settings gear icon. On the right is a search bar with a hamburger menu icon, the text "Hinted search text", and a magnifying glass icon. The main content area of the dashboard is a large gray rectangle.

☰ Hinted search text 🔍

The screenshot shows a web application interface for 'StudentHUB'. At the top right, there are two buttons: 'DASHBOARD' and 'LOG IN'. Below these, a large grey banner displays 'StudentHUB' in a stylized font. Underneath the banner, the word 'RESULT' is centered. Below 'RESULT', there are three input fields labeled 'SUBCODE', 'SUBJECT NAME', and 'GRADE'. A large grey rectangular area is positioned below these fields, likely for displaying results. At the bottom left, there is a label 'CGPA/SGPA:' followed by a grey input field.

<https://github.com/diyatolia1212/StudentHub.git>

E. Challenges Faced:

F. Learning Outcomes:

Understand the initial planning and setup of a web development project by defining the project scope, identifying user roles and modules, creating a sitemap and wireframes, organizing the project structure, preparing documentation, and managing the project using GitHub.
