Practical - 12

Practical Title: Event Management CRUD with Poster Upload and File Validation

Problem definition: Develop event management functionality for admin users. Admin can add, view, update, delete, and upload event posters with file type and file size validation.

Theory:

1. Are add, update, and delete functionalities implemented correctly?

   Answer: Yes, the add, update, and delete functionalities are implemented to manage event records in the database

2. Is the UI linked with the database correctly?

   Answer: Yes, the user interface is connected to the MySQL database using PHP, allowing event records to be displayed and managed.

3. Are poster uploads validated for type and size?

   Answer: Poster upload validation should check the file type and size before uploading. If these checks are implemented in the code, invalid files are rejected.

4. Are success and failure messages displayed?

   Answer: Yes, success and failure messages can be displayed to inform users whether an operation was completed successfully or an error occurred.

A. Implementation/ Output/Result **(Keep only one option which is suitable to practical)**

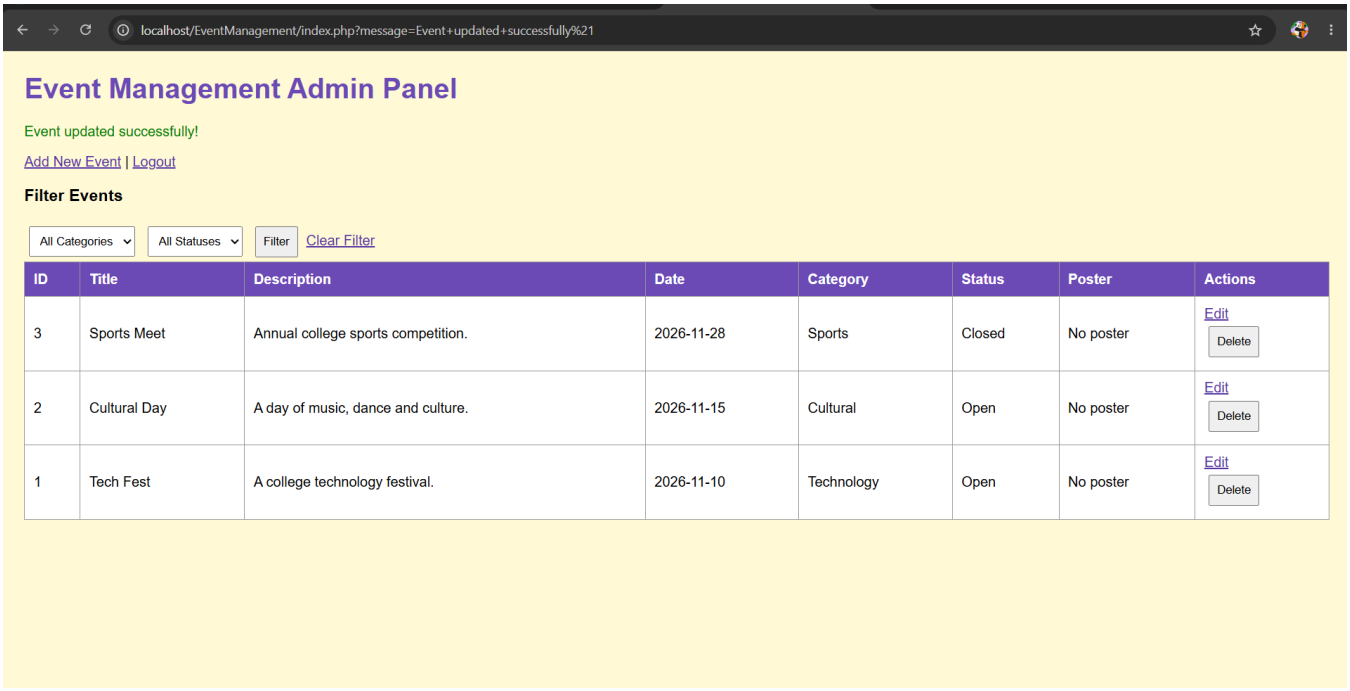

Important PHP functions and features

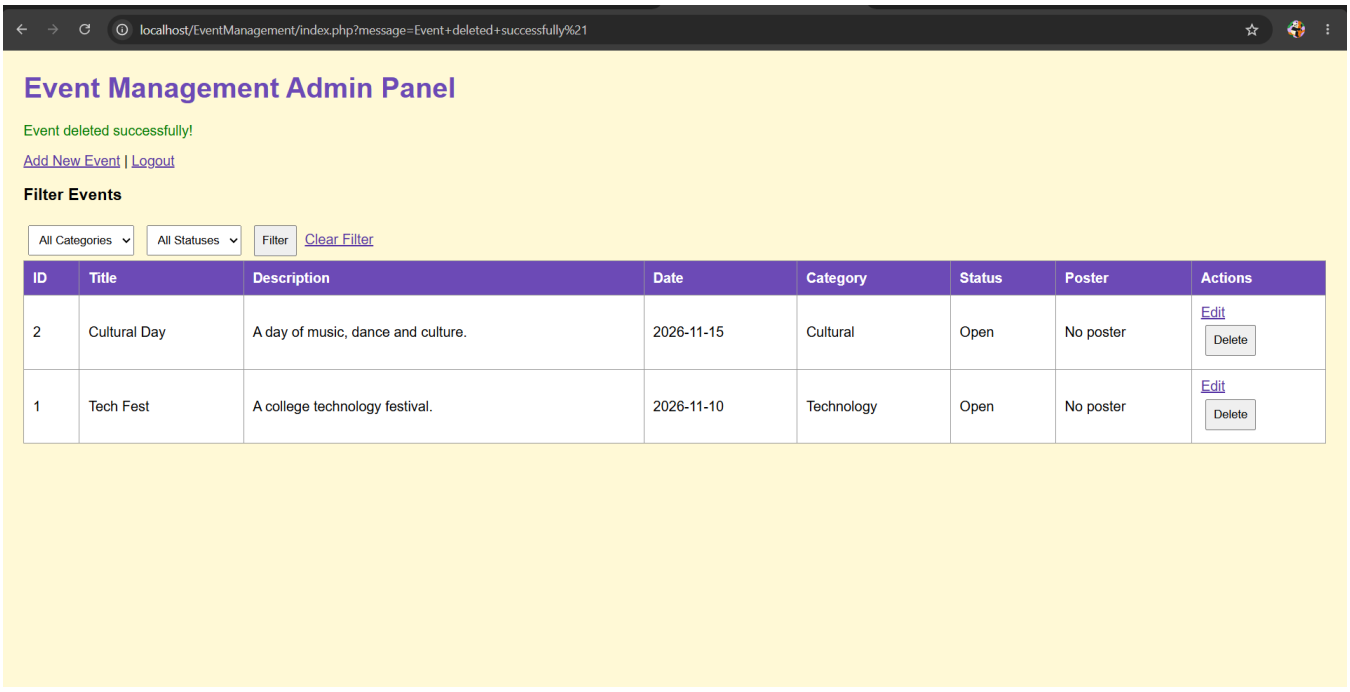

Function / Feature	Purpose
session_start()	Starts or resumes a session.
isset()	Checks whether a variable or value exists.
mysqli()	Connects PHP to the MySQL database.
prepare()	Prepares an SQL statement.
bind_param()	Binds values to a prepared SQL statement.
execute()	Executes the SQL statement.
move_uploaded_file()	Saves an uploaded poster to the upload folder.
getimagesize()	Checks whether an uploaded file contains image data.

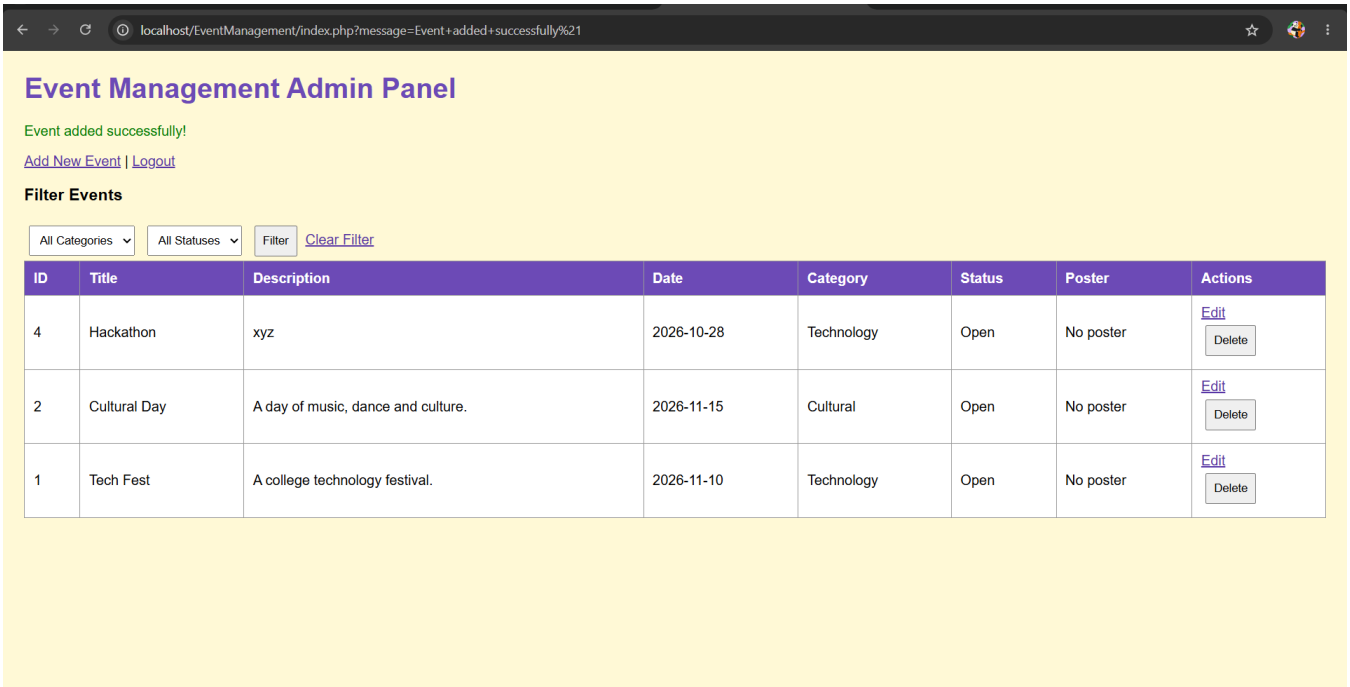

htmlspecialchars()	Helps prevent HTML injection when displaying user input.
header()	Redirects the user to another page.
unlink()	Deletes a file from the server.

B. Evidence of Work (Screenshots)

localhost/EventManagement/index.php?message=Event+updated+successfully%21

D. Challenges Faced:

- Connecting PHP with the MySQL database using `mysqli`.
- Implementing add, view, update, and delete operations for event records.
- Validating poster images based on file type and file size.
- Storing uploaded posters in the correct folder and displaying them on the webpage.
- Displaying success and error messages after performing operations.
- Fixing the blank login page and ensuring that the admin login work

Learning Outcomes:

- Learned how to connect PHP with MySQL using `mysqli`.

- Learned how to perform CRUD operations on event records.
- Understood how to upload poster images and validate their file type and size.
- Learned how to display event details and posters from the database.
- Understood how to manage event categories and open/closed status.
- Learned how to restrict event management pages to logged-in admins using PHP sessions.

Faculty Remarks: **(Keep this blank for faculty)**
